HIPAA One®
PROTECT YOUR ePHI

THE CHALLENGE
Eric Young, HIPAA Security Officer was new to the organization and needed to quickly learn what to look for from a technical standpoint to ensure data security.

THE SOLUTION
HIPAA One® provides HIPAA Security Analysis software and consulting to help individuals like Eric learn what it takes to become and stay HIPAA compliant.

THE RESULT
A mock Security Audit was performed by HIPAA One® demonstrating to Eric and his team how the software can help them identify vulnerabilities and provide a clear direction to travel.

CASE STUDY
HIPAA One® Continues Engagement With Kootenai Urgent Care/North Idaho Family Physicians

Kootenai Urgent Care/North Idaho Family Physicians is owned and operated by 27 physicians in and around the communities of Northern Idaho. In addition to preserving and defending the independent practice of family medicine within Kootenai County, they work extremely hard to stay compliant with HIPAA Laws and Regulations.

THE CHALLENGE
Eric Young, HIPAA Security Officer for Kootenai Urgent Care/North Idaho Family Physicians, has been with the organization for just over a year. He had never formally worked in a position where he was responsible for security and privacy and needed help understanding what to look at from a technical standpoint to ensure their patients data was secure.

ENTER HIPAA ONE®
Steve Marco, CEO of Modern Compliance Solutions and owner of HIPAA One® had worked with the organization for more than five years on different projects. Steve engaged specifically with Mr. Young and his team by demoing the HIPAA One® platform and taking them through a mock HIPAA Security Analysis.

HIPAAONe
PROTECT YOUR ePHI

When asked about his experience demoing the software, Eric stated the following, "HIPAA One® not only gives you a very defined outline of all the rules and regulations required for compliance during the current year, but also all of the rules and regulations for the upcoming year."

"I also appreciated that the software provided a formal report that could be delivered to our Executive Director with specific items of action. We knew exactly the direction we needed to go."

When questioned if Eric and his team will be working with HIPAA One® in the future, this was his reply:

"We know exactly who we are going to use next year to run our security analysis, HIPAA One®!"

ABOUT HIPAA ONE®

HIPAA One® is the leading provider of HIPAA Security & Privacy Analysis software online. Our software and consulting services help minimize vulnerabilities in your organization's process and technologies.
