

THE CHALLENGE

San Juan Health Service needed a quick, but thorough HIPAA Security Risk Analysis performed on their new EMR software to attest to Meaningful Use.

THE SOLUTION

HIPAA One® provides HIPAA Security Analysis software and consulting to help hospitals and clinics like those of San Juan Health Service become and stay compliant.

THE RESULT

A full Security Audit was performed by HIPAA One® assessing vulnerabilities and risks to San Juan's EMR software and providing specific steps to help them become compliant and attest to Meaningful Use.

CASE STUDY

HIPAA One® Engages With San Juan Health Service To Perform Security Risk Analysis of New EMR Software

San Juan Health Service is a county owned hospital and group of clinics located in Southern Utah. Providing quality health care as well as keeping patients information secure is a top priority for the organization.

THE CHALLENGE

San Juan Health Service had recently updated their Electronic Medical Record (EMR) Software across their organization and their team knew there was an urgent need to perform a [HIPAA Security Risk Analysis](#) so they could attest to Meaningful Use.

Physician Support Manager/Clinics Coordinator, Debbie Christiansen, engaged with HIPAA One® after their EMR company's Security Risk Analysis quote came in higher than expected.

ENTER HIPAA ONE®

Steve Marco, CEO of Modern Compliance Solutions and owner of HIPAA One® provided Ms. Christiansen and San Juan Health Services a reasonable quote to perform an on-site HIPAA Security Risk Analysis and thorough reporting through the HIPAA One® online platform. In this particular case, time was of the essence to perform the analysis and HIPAA One® rendered services in one weeks time at a third of the cost quoted by San Juan's EMR company.

**DEBBIE
CHRISTIANSEN,
PHYSICIAN
SUPPORT
MANAGER:**

"We had an extremely positive experience working with Steve and his team"

"The process was VERY effective and the value for what we paid is insurmountable!"

"We had an extremely positive experience working with Steve and his team. It was obvious that they knew exactly what they were talking about and guided us through the process. We needed the analysis performed by a given day and they delivered! It was also impressive that they came to us and spent two full days on site." Said Ms. Christiansen.

"Not only did HIPAA One® help us attest for Meaningful Use in an honest way, they opened up vulnerabilities based on how we do business each day that needs to change. This helps us ensure that our patients information is more secure."

What did Ms. Christiansen like best about working with HIPAA One®?

"The process was VERY effective and the value for what we paid is insurmountable!"
